

THE PANGBURN GROUP

New Roads, LA (November 30, 2017) – The Pangburn Group (Pangburn) announces that it has successfully completed an American Institute of Certified Public Accountants (AICPA) Statement on Standards for Attestation Engagements (SSAE) No. 18 System and Organization Control (SOC) 1 Type 2 examination conducted by NDB Accountants & Consultants, LLP. In doing so, Pangburn maintains its adherence to one of the most stringent, industry-accepted auditing standards for service companies and provides additional assurance to its clients, through an independent auditor, that its business process, information technology (IT), and risk management controls operate effectively.

The official audit report provides a thorough review of Pangburn’s internal controls, policies, and processes for recordkeeping nonqualified benefit plans and employer owned life insurance programs. It also reviews Pangburn’s processes relating to risk management and subservice (vendor) due diligence, as well as Pangburn’s entire IT infrastructure, software development life cycle, change management, logical security, network security, physical & environmental security, and computer operations.

The audit helps to assure clients that Pangburn employs sound operational processes and controls across both recordkeeping and IT. Pangburn has successfully completed a SOC 1 Type 2 audit (formerly SSAE 16-SOC 1 Type 2 and SAS 70 audit) for eleven consecutive years.

About SSAE 18

Effective May 1, 2017, SSAE 16 was replaced by SSAE 18, “Statement on Standards for Attestation Engagements No. 18, Attestation Standards: Clarification and Recodification.” SSAE 18 replaces SSAE 16 along with other SSAEs in an effort to clarify and combine standards. These standards establish requirements and provide application guidance to auditors for performing and reporting on examination, review, and agreed-upon procedure engagements, including Service Organization Controls (SOC) attestations. An SSAE 18 engagement allows a service organization to have its control policies and procedures evaluated and tested (in the case of a Type 2 engagement) by an independent party.
